The 2022 IEEE Conference on Evolving and Adaptive Intelligent Systems (IEEE EAIS 2022) will be held in Larnaca (Cyprus), a picturesque sea side town. Larnaca is a small town combining old colonial architecture with modern buildings. The area has been inhabited for at least 3000 years and is framed in the east by the Larnaca Salt Lake and to the south by the blue waters of the Mediterranean. Larnaca is a gateway to Cyprus with its port and main airport. You can discover the town's past by visiting the Archaeological and Pieridis Museums and by visiting St. Lazarus church which contains the tomb of St. Lazarous, the friend of Jesus.

IEEE EAIS 2022 will provide a working and friendly atmosphere and will be a leading international forum focusing on the discussion of recent advances, the exchange of recent innovations and the outline of open important future challenges in the area of Evolving and Adaptive Intelligent Systems.

Over the past decade, this area has emerged to play an important role on a broad international level in today's real-world applications, especially those ones with high complexity and dynamics change. Its embedded modelling and learning methodologies are able to cope with real-time demands, changing operation conditions, varying environmental influences, human behaviors, knowledge expansion scenarios and drifts in online data streams.

IEEE EAIS 2022 is organized by the IEEE Technical Committee on Evolving and Adaptive Intelligent Systems, SMC Society, and the IEEE Computational Intelligence Society.
