Reference Letter for Easy Conferences

During the last eight years the European Health Psychology Society (EHPS) has established an excellent cooperation with Easy Conferences, a professional conference organizer (<https://easyconferences.eu/>), as a result of their ability and efficiency in providing administrative services of a high standard.

Easy Conferences is responsible for providing several services to the EHPS. These include (but are not limited to) the maintenance, updating and hosting of our website (www.ehps.net), hosting a blog associated with the Society (<https://practicalhealthpsychology.com/>), providing LimeSurvey software services, mailing the EHPS Newsletter and other announcements to the members of the Society, developing and supporting the use of a membership tool.

In addition, Easy Conferences is organizing the annual conference of the Society. Our cooperation has undoubtedly led to the maximum possible success of the conferences, to the significant improvement of the services provided to the participants, as well as to a fully transparent management of the events. Easy Conferences is responsible for handling the entire process: from handling the submitted abstracts, to communicating with delegates, managing scientific and social activities, and managing all financial aspects of the events. All these in a uniquely effective way.

For all of the above reasons, I am more than satisfied with our collaboration with Easy Conferences and I highly recommend them as an outstanding provider of administration and support services.

Sincerely,

Evangelos C. Karademas, PhD, FEHPS

Past-President of the European Health Psychology Society

Professor of Clinical Health Psychology, University of Crete, Greece
Director, Laboratory of Applied Psychology, University of Crete, Greece
Research Fellow, Foundation for Research and Technology-Hellas (FORTH)
Assoc. Editor, Translational Behavioral Medicine
